

Sumeru Chougule

DevOps Engineer

Pune, India | +91 7028244510 | chougulesumeru19@gmail.com | linkedin.com/in/sumeru | github.com/sumeru

PROFESSIONAL SUMMARY

DevOps Engineer with 3 years of experience building secure, scalable, cloud-native solutions on **AWS**. Skilled in **CI/CD** pipelines (**Jenkins**, **GitHub**), **Docker** and **Kubernetes (EKS)**, **Terraform** with remote state, and **GitOps** with **ArgoCD**. Hands-on with **DevSecOps** (**SonarQube**, **Trivy**) and monitoring (**Prometheus**, **Grafana**, **CloudWatch**). Reduced deployment lead time by 40% and improved developer workflow efficiency.

TECHNICAL SKILLS

CI/CD & GitOps: Jenkins, GitHub, ArgoCD, Git, pipeline as code, automated build and deployment, rolling deployments, auto-rollback

Containers & Orchestration: Docker (multi-stage builds), Kubernetes, AWS EKS, AWS ECS (Fargate), HPA, liveness/readiness probes, DockerHub

Infrastructure as Code: Terraform (modular, remote S3 state, DynamoDB locking)

Cloud (AWS): EC2, S3, VPC, IAM, ELB, CloudWatch, CloudTrail, EKS, ECS/Fargate, Glue, Redshift

DevSecOps: SonarQube, Trivy, IAM least privilege, AI-assisted pull request security review

Monitoring: Prometheus, Grafana, CloudWatch, CloudTrail

Scripting & OS: Bash/Shell, Python, Linux

Practices: Agile/Scrum, SDLC, disaster recovery, data backup

PROFESSIONAL EXPERIENCE

Thinglcloud Solutions Pvt. Ltd., Pune

Jul 2026 – Present

DevOps System Admin

- Built pipeline-as-code **CI/CD** for microservices with **Jenkins**, **Git**, **GitHub** and **Docker**, with email notifications giving developers immediate feedback after code check-in.
- Deployed containerized applications on **AWS ECS (Fargate)**: created clusters, task definitions and services, and configured **VPC** networking, security groups, **IAM** task execution roles, container ports and CPU/memory settings.
- Implemented core infrastructure and security services: **Elastic Load Balancers**, **CloudWatch**, **CloudTrail** and a dedicated Security Management **VPC** for monitoring, compliance and traffic management.
- Managed and scheduled automated build scripts across Dev, QA and UAT environments with **Git** source control.
- Improved developer workflow, scalability and speed by over 40% by using **Docker** to break monolithic applications into microservices.
- Administered networks, systems and application environments; performed data backup and disaster recovery operations.

Gateway Softwares Pvt. Ltd., Pune

Jun 2025 – Jul 2026

Associate Engineer

- Architected an end-to-end **CI/CD** pipeline with **Jenkins**, **SonarQube**, **Trivy** and **DockerHub** covering build, test, security scanning, artifact management and deployment.
- Developed a zero-downtime **Kubernetes** rolling deployment strategy across 2+ environments using **readiness and liveness probes**.
- Engineered an auto-rollback mechanism that monitors post-deployment health metrics and triggers **kubectl rollout undo** when anomalies are detected.
- Authored modular **Terraform** scripts for automated provisioning, eliminating configuration drift and enabling rapid disaster recovery.
- Collaborated with development and operations teams to promote continuous improvement and shared ownership.

KPIT Technologies, Pune

Dec 2023 – Jun 2025

Trainee Engineer

- Designed and implemented an end-to-end **ETL** pipeline on **AWS** to process ADAS vehicle sensor telemetry from a fleet of connected vehicles.
- Built **AWS Glue ETL** jobs to extract, transform and load sensor event data from **Amazon S3** into **Amazon Redshift**, achieving 99.9% pipeline reliability.
- Managed **AWS IAM** roles and policies using least privilege to secure access between **Glue**, **S3**, **Redshift** and **CloudWatch**.
- Analyzed functional specifications and business requirements to produce design and development deliverables.
- Delivered features on time across 8+ Agile sprints in a cross-functional team.

PROJECTS

- GitOps-Driven CI/CD Deployment Pipeline

AWS EKS | ArgoCD | Terraform
- Automated pull request reviews in the **CI/CD** pipeline using AI to scan git diffs for security vulnerabilities, cutting manual review time by 40%.
 - Built and deployed a containerized application on **AWS EKS** using **multi-stage Docker builds**, **Kubernetes** rolling updates, **Horizontal Pod Autoscaler** and **liveness/readiness probes**.
 - Implemented **GitOps** continuous deployment with **ArgoCD**, using self-healing and drift detection so cluster state always matches **Git**-defined manifests.
 - Provisioned **AWS** infrastructure with **Terraform** using remote **S3** state and **DynamoDB** locking.

EDUCATION

- Bachelor of Technology, Electronics and Telecommunication

Aug 2020 - Jun 2024
- Rajarambapu Institute of Technology | CGPA: 7.8/10.0
